Pipe Colour Code

EGIC makes water supply and drainage systems, and installers read pipes by colour. Each tool runs on its own pipe colour, the header is a pipeline with a valve per tool, and work flows along pipes from source to result.

Colour

light · dark

-   **Supply green · Cars**
#0f7f56 · #3ccb8f
-   **Cold-water blue · ID reader**
#2563d8 · #6ea2ff
-   **Hot-water orange · Traders**
#c4410d · #ff8a57
-   **Canvas**
#f4f8f9 · #0b1520
-   **Surface**
#ffffff · #111e2b
-   **Seam line**
#dce6ea · #22364a
-   **Text**
#0f1c2b · #e8f0f5
-   **Pass · warn · fail**
#0f7f56 · #3ccb8f
warn #b45309 · fail #c62828

One pipe rule. A page uses only its own tool's colour as accent. Every text pair clears 4.5:1 in both themes.

Type

Alexandria · Latin + Arabic

Quantity must be positive

Pipeline navigation

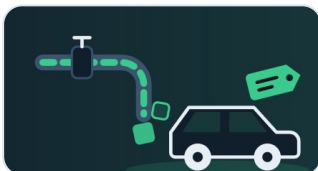

Water runs to the active valve; the page takes that valve's colour and slides in from its side.

Graphics

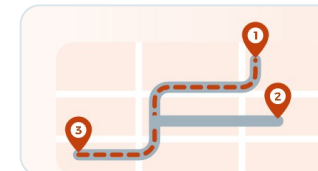

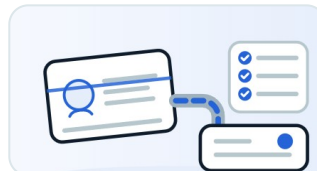

one flat pipe-run drawing per tool, drawn with theme tokens; dashed water moves along the pipe

Cars · parts flow down a supply line into a vehicle

ID reader · the card flows into a checked form

Traders · a route through the street grid to numbered drops

Cars & Products

Price product lines per vehicle. Drag parts onto a vehicle or add a line; quantities and prices edit in place and every total updates as you type.

+ Add line

Merge, don't duplicate

Adding a part a vehicle already has, at the same price, raises its quantity instead of adding a second line.

Totals you can trust

Integer-piaster maths; totals count to their new value and show which lines they sum.

Three ways to add

Drag from the parts list, use the add-line form, or drag a line onto another vehicle.

Oil Filter

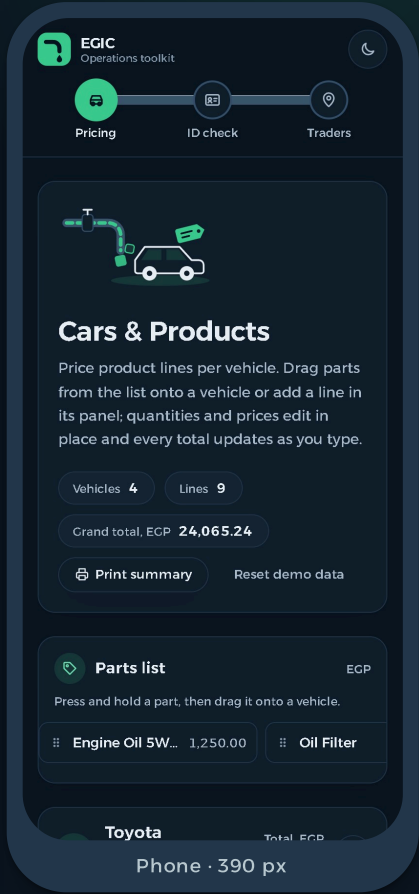

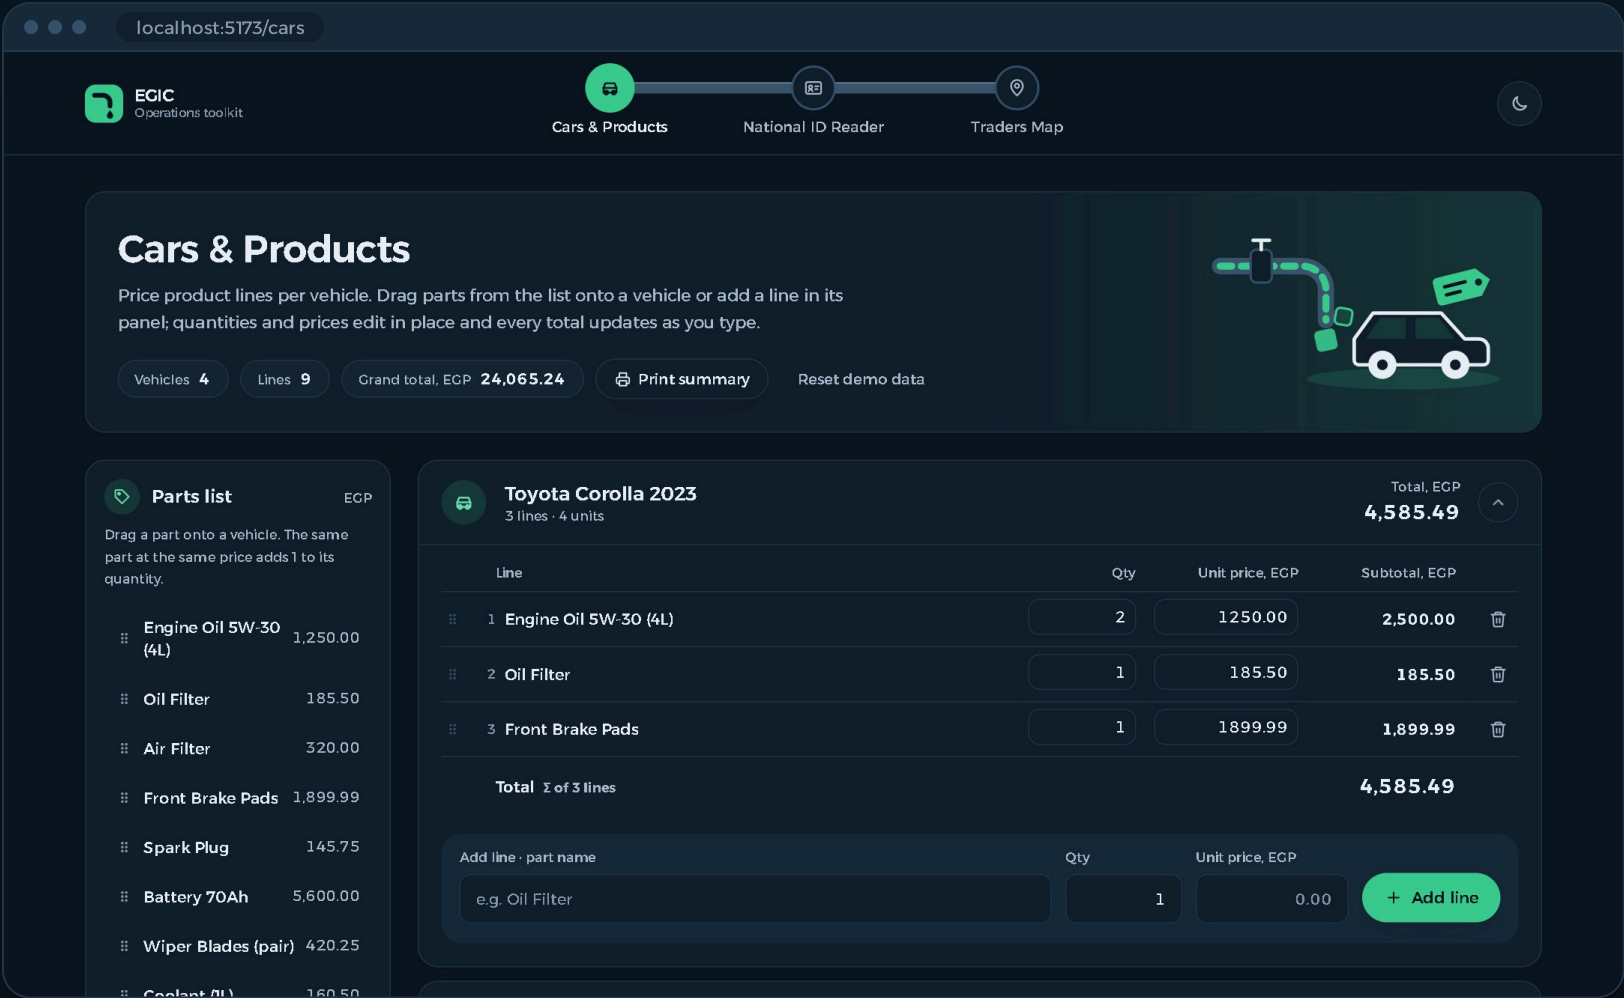

Toyota

Total EGP

Phone · 390 px

Cars & Products

The same page on the duct-navy theme: surfaces step up in lightness and supply green brightens to glow on navy.

Same tokens, mirrored

One token set: data-theme swaps the palette, so every component works in both themes.

Dense stays dense

Tables keep tight rows, hairline rules and tabular figures; the softness lives in the shell.

Phone layout

The parts list becomes a swipe strip (press and hold to drag); tables restack below 640 px.

Cars & Products · states and print

Validation, drag & drop and the printed price summary, the moments where the page has to explain itself.

Toyota Corolla 2023

3 lines · 4 units

Total, EGP
4,585.49

Line	Qty	Unit price, EGP	Subtotal, EGP	
1 Engine Oil 5W-30 (4L)	0	1250.00	2,500.00	
2 Oil Filter	1	185.50	185.50	
3 Front Brake Pads	1	1899.99	1,899.99	
Total 3 of 3 lines			4,585.49	

Add line · part name

Amounts in Egyptian pounds, calculated to the piaster. Printed from the EGIC Operations Toolkit.

Print summary. One A4 sheet: each vehicle's items, vehicle totals and the grand total. Always printed light; “Save as PDF” gets a dated file name.

National ID Reader

Read an Egyptian national ID from a photo or PDF, front and back. Two engines, both on this machine: the Local ML Model and Browser OCR.

Local ML Model

CRAFT text detector + Arabic CRNN recogniser on this PC (GPU when available). Photos and PDFs, both sides.

Values point to their source

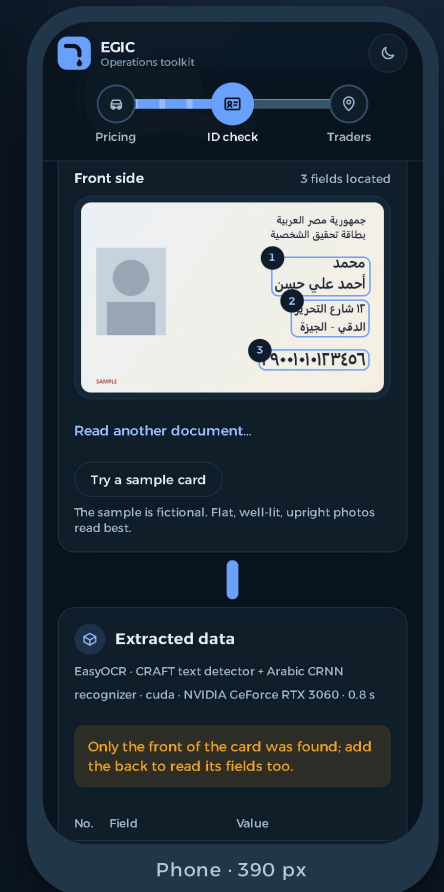

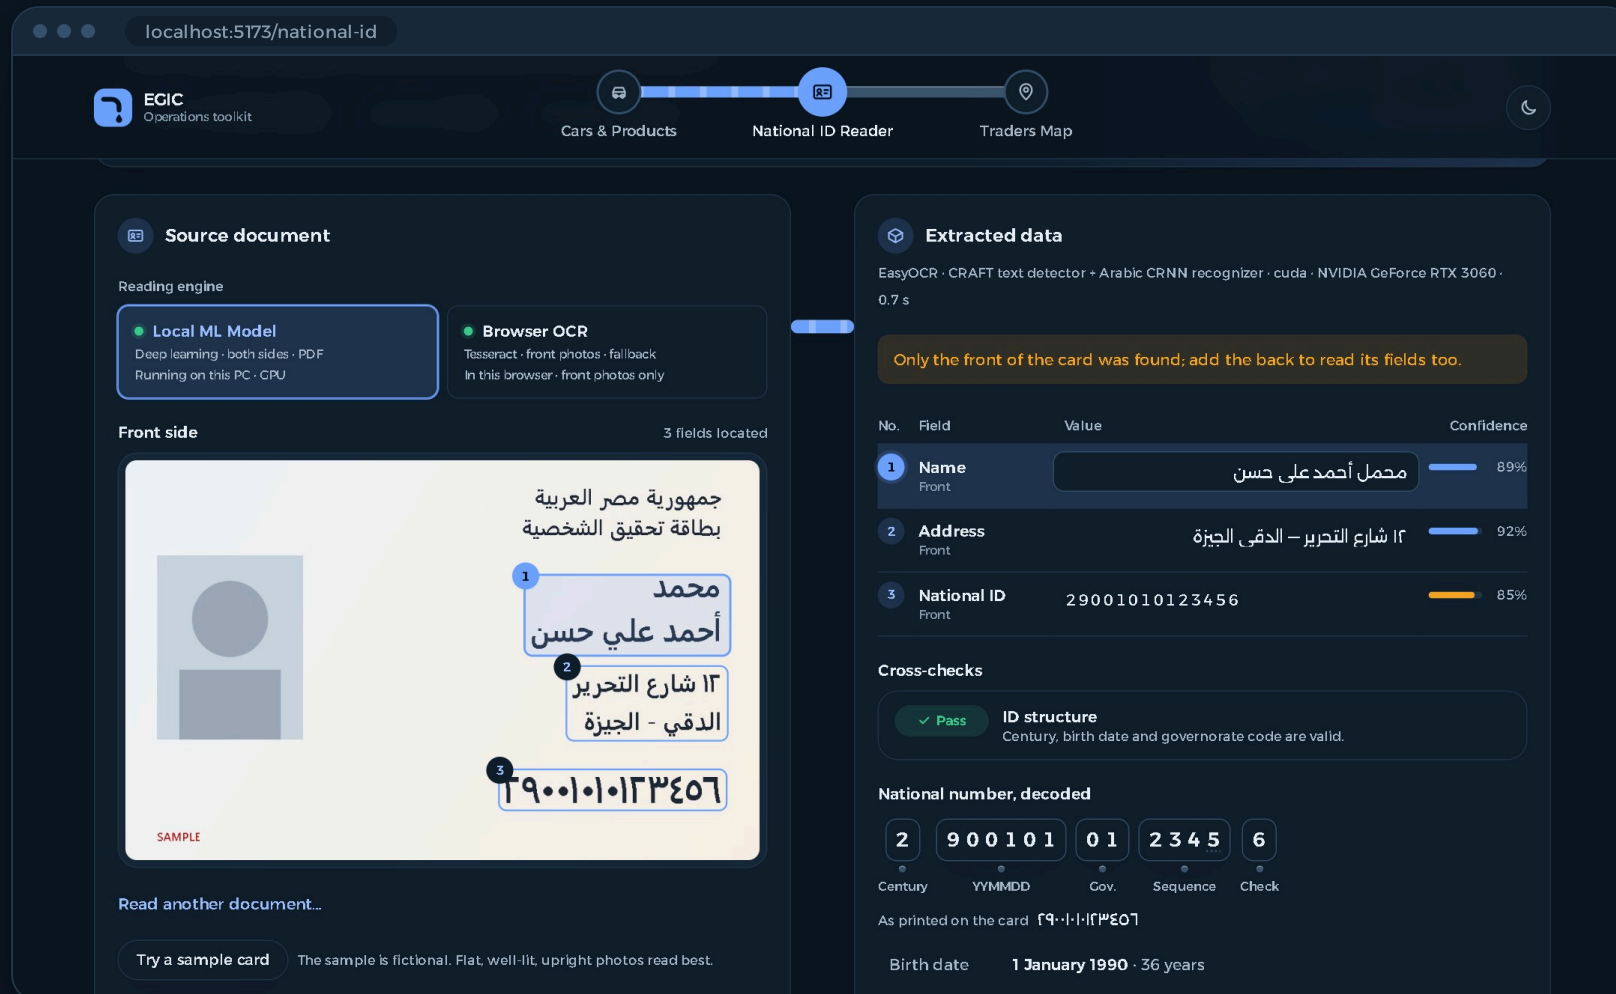

Numbered tags link each field to the text found on the card; hovering either lights both.

Checks re-run as you edit

ID structure, front ↔ back agreement and validity recompute from the current values.

National ID Reader

Cold-water blue on navy. The flow connector between the panels fills while the model reads and stays full once results are in.

Honest confidence

Bars fill from the inlet: blue from 85 %, amber from 60 %, red below. Every value stays editable.

Browser OCR fallback

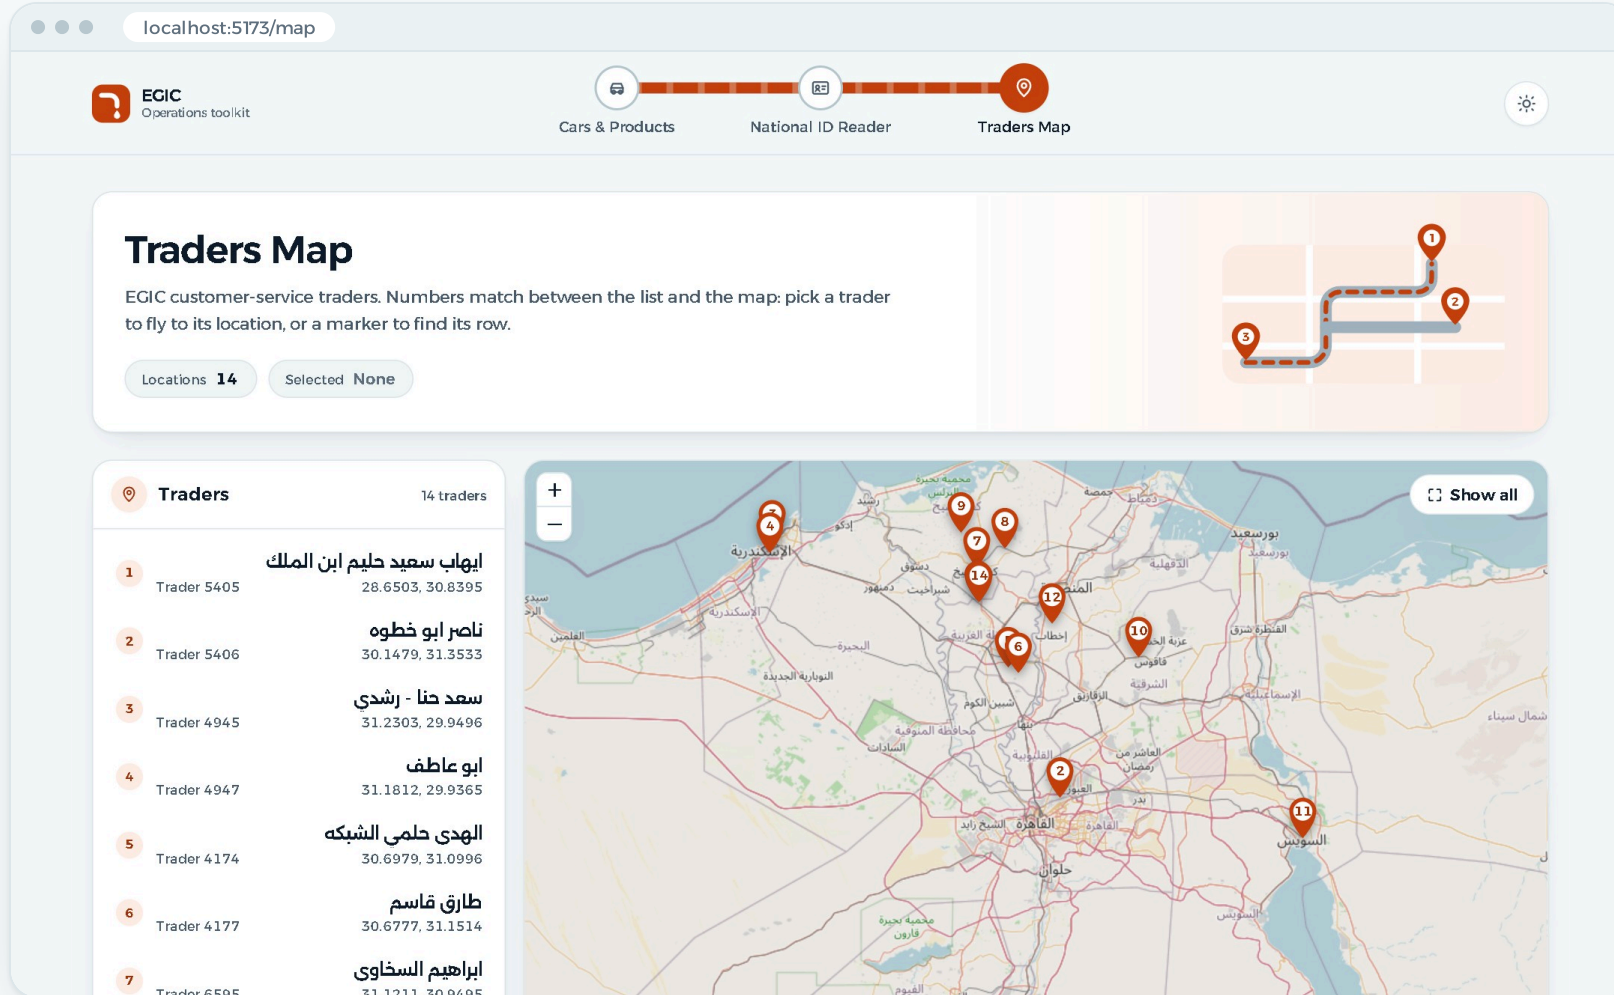

Tesseract in the browser keeps the page usable for front photos when the service isn't running.

Nothing leaves the PC

Uploads are processed in memory by the local service and never stored or sent to a third party.

Traders Map

The 14 EGIC traders on one map. Numbers match between the list and the map: pick a trader to fly there, or a marker to find its row.

Numbers link list and map

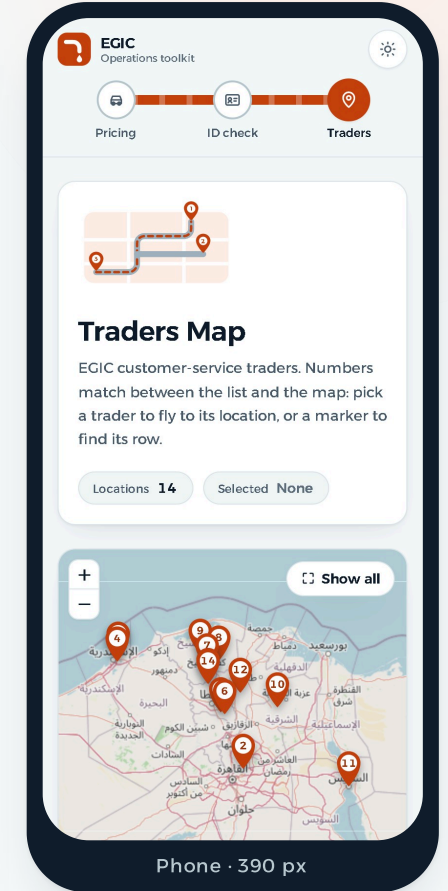

Each water drop carries its list number, so nobody has to read Arabic names at map scale.

Fly, then open

Picking a trader flies the map to it and opens the popup when the flight ends.

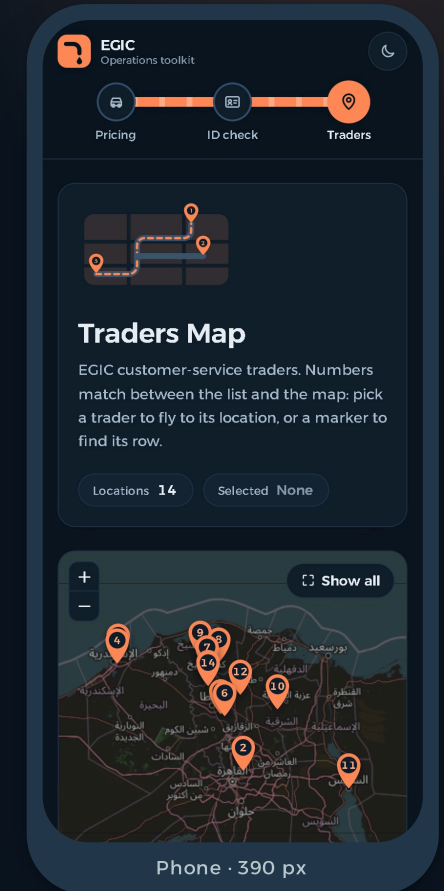

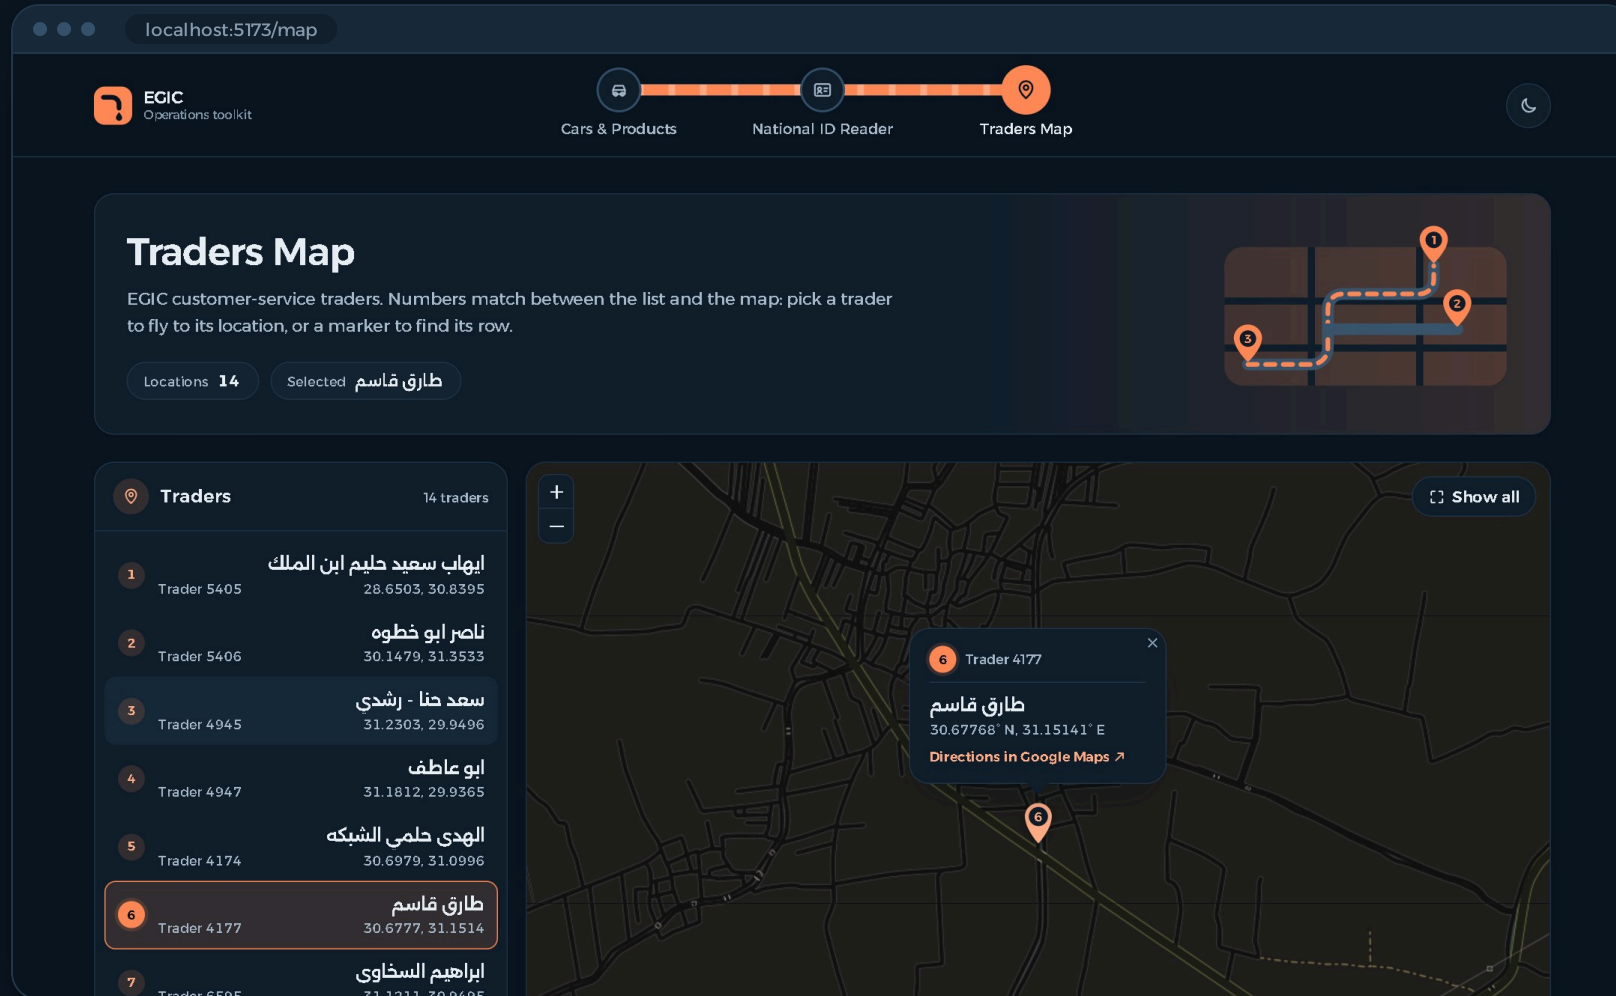

Hover previews the link

Hovering a row lifts its marker; hovering a marker highlights its row.

Traders Map

A selected trader on the dark theme: the list band, the enlarged drop and the popup all follow the palette.

One tile set, two themes

OpenStreetMap tiles re-toned with a CSS filter: no API key, nothing reloads on a theme change.

Popups follow the theme

Leaflet popups and controls are restyled with the app's tokens and rounded shapes.

Map first on phones

The map leads at 58 % of the screen; picking a trader scrolls back up to it.

Motion, layout and access

Motion explains state and never decorates. Every animation has a reduced-motion path and never blocks the work.

Motion map

Tool change	Water runs along the header pipe to the chosen valve; the accent glides to the new colour; the page enters from that side.
Theme toggle	Sun and moon swap with a turn; the new theme floods outward from the button.
Live totals	Totals count to the new value with a flash of the tool colour and always land on the exact figure.
Lines	New, moved or merged lines wash in the accent; deleted lines slide out while the rest glide up.
Forms	Errors unfold under the field; a rejected submit shakes the invalid fields; Add turns into a check.
ID reader	A scan line sweeps the card; water flows through the connector; confidence bars fill from the inlet.
Map	List hover lifts a drop; selection grows it and pings a ring; the popup opens from its tip after the flight.

Responsive

- **Header:** the pipeline drops to its own row below 1024 px and uses short names on phones.
- **Cars:** the parts list becomes a swipe strip; tables restack into label/value rows below 640 px.
- **ID reader:** panels sit side by side from 1280 px; the flow connector turns vertical when stacked.
- **Map:** the map leads on phones; picking a trader scrolls back to it.

Accessibility

- Text contrast $\geq 4.5:1$ in both themes; focus rings on every control.
- Drag & drop works with the keyboard and announces results; the add form is the non-drag path.
- Arabic content is marked `dir="rtl"`; list rows are buttons with `aria-current`.
- `prefers-reduced-motion` swaps movement for opacity and colour.

Colophon

React 19 · TypeScript · Tailwind CSS v4 tokens · Alexandria · Leaflet with OpenStreetMap tiles · Local ML Model (EasyOCR on PyTorch). Screens captured from the running app with headless Chrome at 1440 × 1000 and 390 × 844.
